PROJECTS

CUSTOM BUDGET FOR INFOR

DEVELOP CUSTOM BUDGET

- Identify Stakeholders
- Identify scope & Gather requirements
- Develop basic architecture
- Create
 - Custom Entities like Cost Center, GL Codes
 - Custom Tables
 - Custom User Defined Screens
 - Custom Tabs

API FOR INTEGRATION

DEVELOP SINGLE API TO COMMUNICATE WITH ALL PLATFORMS AND REAL TIME INTEGRATION

- Identify Business models to be integrated
- Identify Data/Columns to be exposed using the api
- Identify correct tools and technology
- Decide and implement proper authorization for all data activities

WASEEF MOBILE APPLICATION

The Mobile application allows the public to register, login and apply for units in various properties in Waseef. User can see his application status and position in the queue if the application is approved by Leasing Manager. Mobile app is completely integrated with the Property Management Application(Yardi), which enables the Leasing team to login to a single application to complete the application process till converting the applicant to a tenant.

PROJECTS

LEASE CONTRACT

Waseef Lease Contract is a web based Automated Mail merger application to fill word file templates with values fetched from the databases and Yardi Application. The word file is archived in the server and can be used for future references. Various graphs are created in the dashboard to analyze the performance (or usage of application) by users or by their manager.

WASEEF WEBSITE

Waseef website, built on wordpress supports English and Arabic Language. Various contact forms created in the site are transformed into many applications on various platforms (like Facebook, Android), but helps to group and segregate the data under a single database and administration panel.
